# BIOTIC COMMUNITIES OF THE ASPEN PARKLAND OF CENTRAL CANADA<sup>1</sup>†

RALPH D. BIRD

*Department of Zoology, University of Oklahoma, Norman, Oklahoma*

I. Introduction .....	359
II. Parkland of Central North America .....	362
The Aspen Parkland .....	362
III. The Physical Environment .....	363
1. Geology of Southern Manitoba .....	363
2. Topography of Southern Manitoba .....	364
3. Climate of Southern Manitoba .....	365
IV. Methods Used in Investigation .....	367
V. Major Biotic Communities of the Aspen Parkland .....	369
A. Prairie Community .....	369
<i>Agropyron-Microtus</i> Associates	
1. Plants .....	370
2. Animals (Presocieties) .....	370
a. Formation influents .....	373
b. Influents of narrower range .....	373
c. Sub-influents of the Prairie .....	376
(1) Local visitant vertebrates .....	378
(2) Open season birds .....	379
(3) Mammals of lesser influence .....	380
d. Sub-influents of minor importance .....	381
(1) Small vertebrates .....	381
(2) Invertebrates .....	381
e. Subordinate Communities .....	381
(1) Stratal or layer communities .....	382
(a) Soil stratal or layer societies .....	382
(b) Surface and herb societies .....	382
(2) Seasonal Communities .....	382
(a) Estival-serotinal societies .....	382
f. Biotic Interaction (Coaction) .....	384
g. Comparison with other communities .....	384

<sup>1</sup> Contribution from the Zoological Laboratory of the University of Illinois No. 365.

† This paper is published with assistance from a fund solicited to publish papers on biotic communities in book form. The book was found impracticable, and the individual donors whose names appeared in the Bull. of the Ecological Society of America in 1926 consented to its use toward the publications of long articles. Twenty-five dollars from the American Association for the Advancement of Science and the same amount from the American Society of Zoologists were used for this paper. This is also the fifth paper published with the assistance of the fund contributed by Sustaining Members for the publication of longer papers. It is not a supplement because its length permitted publication in the usual manner, with the expense for over pages and extra illustrations defrayed from the sources above mentioned.
